B.Tech, Computer Science and Engineering

Address : E-17 ABHILASHA APARTMENTS, 2ND MAIN ROAD, NEW COLONY VIRUGUMBAKKAM CHENNAI

Summary

Motivated Computer Science Engineering undergraduate with a solid foundation in programming, databases, and application development. Hands-on experience in Python, SQL, C/C++, and Java through projects and internships. Strong problem-solver with a passion for creating user-focused solutions and working in collaborative environments. Looking to apply technical skills, adaptability, and a growth mindset in entry-level software or engineering role.

Education

SRM IST-Kattankulathur

B.Tech · Computer Science and Engineering

2027

CGPA - 8.81/10

LOYOLA SCHOOL

Class XII · CBSE · TRIVANDRUM

2023

Percentage - 81%

LOYOLA SCHOOL

Class X · CBSE · TRIVANDRUM

2021

Percentage - 91%

Experience

FLSmidth Private Limited

Intern · Internship

Jun 2025 - Jun 2025

Chennai

Automation & Data Analysis Intern

- Performed exploratory analysis on engineering workflows to identify inefficiencies and improvement opportunities.
- Developed Python-based scripts to validate automation hypotheses and quantify potential productivity gains.
- Collaborated with engineers and stakeholders to gather requirements and translate operational problems into technical solutions.
- Presented analytical findings and actionable recommendations to support data-driven process optimization.

Projects

Internship Progress & Assessment Portal

FLSmidth · Python, Flask, SQLite

- Designed a centralized platform to analyze intern performance metrics and track progress across evaluation cycles.
- Built structured relational databases to support reporting, trend identification, and historical analysis
- Created role-based dashboards enabling reviewers to derive insights and support data-backed decisions.

Gamified Learning Website

· Java, Supabase

- Implemented engagement-driven features such as points, levels, and leaderboards to analyze user behavior
- Collected interaction data to study participation patterns and feature effectiveness
- Derived insights on retention drivers and user motivation using gameplay metrics.

Digital Lost & Found System

· HTML, CSS, Flask, MySQL

Web Application

- Designed a web-based platform to report, track, and manage lost and found items within a centralized system.
- Implemented structured databases to store item details, user information, and claim requests for efficient retrieval and management.
- Developed interactive interfaces for posting lost/found items and enabling users to search, match, and claim belongings through a streamlined workflow.

Certifications

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional

Oracle Database@AWS Certified Architect Professional

Design and Analysis of Algorithms (IIT Madras)

NPTEL

Machine Learning (IIT Kharagpur)

Conferences and Workshops

AWS Cloud AI Practitioner Workshop

AWS

Skills

Programming Languages: Python, Java, C, C++, SQL

Technical Skills: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems (processes, memory, threads– basics), Computer Networks (fundamentals), SQL optimization

Languages and Frameworks: Flask, JDBC, RESTful APIs

Tools and Technologies: MySQL, SQLite, Generative AI Tools, LINUX, GIT

Domain Knowledge: Agile/Scrum methodology

Languages

English [Professional Working Proficiency], Malayalam [Professional Working Proficiency], Tamil [Limited Working Proficiency]
